SUMMARY

Highly proficient MERN Stack Developer adept at designing and deploying scalable, responsive web applications. Leverages expert knowledge of MongoDB, Express.js, React.js, and Node.js to build robust, high-performance full-stack solutions.

EXPERIENCE

MernStack Developer   Aug 2023 – Sep 2025
Logic Valley Software House

• Engineered and optimized robust full-stack MERN applications (MongoDB, Express.js, React.js, Node.js) at Logic Valley Software House, delivering scalable and high-performance solutions. Drove project efficiency and ensured the successful delivery of complex software products, directly contributing to organizational success.

PROJECTS

My Own Website Haseeb MernStack
Portfolio Website

• Developed a fully functional personal portfolio website using the MERN stack, featuring secure login and signup authentication. Implemented an admin dashboard that allows me to efficiently manage project details, including images, live demo links, and GitHub repository links. Designed the website with a modern and visually appealing theme, ensuring a smooth and responsive user experience across all devices.

Create AI Resume Builder
Resume builder application

• Built a powerful Resume Builder Application using the MERN stack, integrated with ImageKit.io for optimized image handling and Google Gemini AI for intelligent content enhancement. The platform allows users to create, edit, and share live resume links that can be viewed publicly or privately. Implemented secure authentication (login/signup) to ensure only registered users can manage their resumes. Added features for PDF download,

public/private sharing controls, and designed a modern, user-friendly, and visually appealing UI to deliver a seamless user experience.
